

Panama CZ Veterans...  
SPRAYED, DENIED, FORGOTTEN...

*Rare cancers like sarcoma of the face isn't a new thing, but has been very well hidden from view.*

*Please help our veterans suffering from toxic exposure. It is up to you!*

Soft tissue SARCOMA (Agent Orange)  
dioxin poisoning verified by VA lab  
testing and by Aberdeen Proving  
Grounds Chemical Lab

This is the face of Agent Orange damage from a rare sarcoma Cancer of the face.

Army veteran Major Frank Cayer. He was not a burn pit victim, but was subjected to spraying of herbicides 2,4-D & 2,4,5-T (aka Agent Orange) in the Panama Canal Zone in 1977.

Panama veterans like Frank are suffering from the VA registered diseases but are not heard.

Please see [agentorangeinpanama.com](http://agentorangeinpanama.com) for Panama CZ proof.

*The VA Secretary was asked to add Panama to the Presumptive list. Secretary McDonough opened CFR comments to collect proof. We gave him plenty and Panama CZ Veterans were ignored.*

*Had two bills, H.R. 5206 (117) and H.R. 2447 (118) introduced for Panama CZ veterans  
With very little support from Congress*

*It is time for ACTION!  
60 years asking for help is insane!*

*Ask the VA to do the right thing and respond to the Request for Presumptive status for Panama CZ veterans NOW!*

*Many just like me who were exposed in the Panama CZ are still ignored and suffer in silence.*

*Please see my story <https://www.wfla.com/8-on-your-side/investigations/records-reveal-cancer-causing-herbicides-shipped-to-panama-made-veterans-sick/>*

*Veterans in Congress, do what is right and give Panama CZ veterans access to Disability and VA Benefits without delay!*
